**September 26-27, 2024 (Thursday to Friday)**

LIDAR is an acronym of "light detection and ranging" or "laser imaging, detection, and ranging". It is a method for determining ranges by targeting an object or a surface with a laser and measuring the time for the reflected light to return to the receiver. Real Time Kinematics. RTK is short for real

kinematics. A GPS receiver capable of RTK takes in the normal signals from the Global Navigation Satellite Systems along with a correction stream to achieve 1cm positional accuracy. Topics are the following: How to work with vector and raster data. Familiarization with Hydro, Lidar using Drone, RTK, and actual/Hands-on of eSURVEY Application with following functions;

Boundary Computation Subdivision Computation DENR BL Plan LRA Plan Lot Data Computation Auto CAD 2002 to 2022 version	Traverse Digital Land Survey Data Electronic Technical Descriptions CAD to Google Earth With Profile Cross Section Auto Contour
