**2nd Research Fellowship Training Course Program across Disciplines
Crafting the Foundations: Mastering Key Elements of Research Study Development**

August 9-11, 2024
Immaculate Conception College of Balayan, Inc.
Balayan Batangas

In today's dynamic research landscape, where interdisciplinary collaboration reigns supreme, mastering the fusion of quantitative and qualitative methodologies is paramount for scholarly success. Just as proficient research pedagogy lays the groundwork for students' academic journey, adept integration of these methodologies serves as the compass in guiding researchers through the complexities of inquiry. From designing robust studies to navigating the nuances of data analysis, our 2nd Research Fellowship Training Course Program across Disciplines equips participants with the tools and expertise needed to excel in diverse research environments.

This training workshop aims to equip participants with the knowledge and skills necessary to conduct rigorous and multi-dimensional research projects. Through theoretical foundations, practical applications, and hands-on exercises, participants will clearly understand key concepts, enhance their research writing skills, and gain the expertise needed to make informed decisions on selecting appropriate methodologies for their research questions. Ultimately, the goal is to empower participants to produce high-quality research and contribute meaningfully to their respective fields.

The GET International in partnership with Professional Continuing Education, a Nationwide PRC CPD Accredited Provider with accreditation no. PTR-2022-373 of Zamboanga Peninsula Polytechnic State University organized three comprehensive immersive training workshops on "Research Fellowship across Disciplines: Crafting the Foundations: Mastering Key Elements of Research Study Development."

This three-day event promises to be a transformative experience, where you will delve into the synergy between qualitative and quantitative methodologies, fostering interdisciplinary collaboration and innovation.

The objectives of the training:

1. Equip participants with a comprehensive understanding of both quantitative and qualitative research methodologies, empowering them to design robust studies and enhance their research writing skills;
2. Provide practical experience through theoretical discussions, case studies, and exercises, enabling participants to apply these methodologies effectively in their research projects; and
3. Foster critical thinking and decision-making skills to enable participants to select the most appropriate research methodology based on the nature of their research questions and justify their choices through written analysis or presentation.
